

[Case Reports in Emergency and Internal medicine](#) publishes emergency case reports journal, internal medicine case reports journal, images in internal medicine, clinical videos in internal medicine etc. Internal medicine is the branch of medicine dealing with the prevention, diagnosis, and treatment of adult diseases. Emergency medicine is a medical specialty involving care for undifferentiated, unscheduled patients with acute illnesses or injuries that require immediate medical attention.

Emergency Medicine is a medical specialty to provide immediate medical assistance to patients in urgent need during acute illness, injuries, and accidents. Medical emergency always test the patience, perseverance and mental strength of a patient as well as the patient's family. Emergency care is special medical practice based on the acquired knowledge and skills required for the prevention, diagnosis and management of acute and urgent aspects of illness and injury affecting patients of all age groups with a full spectrum of physical and behavioral disorders. It further includes an understanding of the development of pre-hospital and in-hospital emergency medical systems and the skills necessary for this development. Internal medicine is the field of managing the diagnosis, prevention and treatment of diseases. Physicians specializing in internal medicine are called internists, or physicians. Internal medicine physicians are expertise who apply scientific knowledge and clinical expertise to the diagnosis, treatment, and compassionate care of adults over the range from health to complex sickness. Internal medicine additionally also covers clinical pharmacy and veterinary medication. The specialist in internal medicine-the internist-are specially trained to tackle puzzling diagnostic issues and can handle intense chronic illnesses and scenarios where few separate diseases might strike at the same time.
