

Journal of Clinical Studies & Medical Case Reports

Journal of Clinical Studies & Medical Case Reports could be defined as a scientific documentation of a clinical observation which involves a detailed study of all the perspectives & parameters that come into play during the execution of a particular study, whether it might be a clinical / experimental study on a particular subject or a medical / surgical treatment. Case reports enable an individual to get a clear, relevant, and a timely study design that helps in understanding the case abruptly, which helps in directing the treatment in a right & necessary way. Moreover case reports have a great importance in advancing the scientific knowledge especially in the cases of rare diseases.

Journal of Clinical Studies & Medical Case Reports is broad scope, peer reviewed journal that covers all aspects of clinical specialties and medical sciences. International Journal for Case reports aims to keep scientists, clinicians and medical practitioners, researchers, and students up-to-date by publishing interesting articles on the on-going research of their relevant field. This open access journal allows outstanding quality articles to maintain the standard of journal and to obtain high impact factor. Journal welcome case reports that are of great importance in every field of scientific research such as clinical, medical, surgical, analytical, and diagnostic fields.

Case Reports in Cardiology

Cardiology is a branch of internal medicine, deals with the scientific studies on various types of anomalies related to heart as well as circulatory system. The cardiological studies covers the diagnosis and treatment of disorders of heart, which includes coronary artery disease, congestive heart failure, congenital defects, heart failure etc. The cardiologists-specialists of the branch, classified into two categories: general cardiologists, who are adequately trained to treat adults and another type is paediatric cardiologists, who are trained to treat children. However, both types of physicians are having the immense importance in both clinical and experimental studies, which they publish in the form of case report. Such case report describes and provides a detail insight into disorders related to heart and thereby, contributes a landmark guidance for other cardiologists, which helps to determine more safe and secure cardiological therapeutics.

Related Journals of Cardiology

International Journal for Case Reports, Journal of Transplantation Technologies & Research, Journal of Clinical & Experimental Cardiology, Journal of Cardiovascular Diseases & Diagnosis, Cardiovascular Pharmacology: Open Access, Cardiovascular and Hematological Disorders - Drug Targets, Current Drug Targets - Cardiovascular and Haematological Disorders, Cardiovascular Drugs and Therapy, Cardiovascular Psychiatry and Neurology, Cardiovascular Research, Cardiovascular Therapeutics, Cardiovascular Toxicology.

Case Reports in Ophthalmology

Ophthalmology is the branch of internal medicine that deals with the study of eye and its associated-disorder. In detail, it includes the study of anatomy, physiology and diseases of eye. The physician, who specialises in the field of ophthalmology are called ophthalmologist. An ophthalmologist deals with both medical and surgical problems of eye. Ophthalmology includes both human and animal eyes. Specialized cases, that ophthalmologists use to face during clinical and experimental studies provides details about disorders relating to eye and such reports are found to be effective to diagnosis and treatment other similar cases. Such reports are called ophthalmology case reports, which are having immense importance in ophthalmological health and disorders.

Related Journals of Ophthalmology

Journal of Clinical Case Reports, Clinical & Experimental Ophthalmology, Optometry: Open Access, International Journal of Ophthalmic Pathology, Glaucoma: Open Access, German journal of ophthalmology, Albrecht von Graefes Archiv fur klinische und experimentelle Ophthalmologie, Investigative Ophthalmology and Visual Science, Investigative Ophthalmology, Association for Research in Vision and Ophthalmology.

Case Reports in Neurology

Neurology is the branch of internal medicine, which deals the diagnosis, treatment of disorders related to nervous system. Such studies include both central and peripheral nervous system. The physicians, who specialises in the field of neurology are called neurologist. Neurology is a non-surgical speciality; the corresponding surgical speciality is called neurosurgery. The physicians, who performs the surgery on brain and other nervous tissues are called neurosurgeon. Neurology case reports-the specialized case handseling study summary, are of valuable piece of scientific contribution by neurologists. Such report helps to solve various similar kinds of anomalies worldwide.

Related Journals of Neurology

International Journal for Case Reports, Journal of Neurology and Neurophysiology, Journal of Neurological Disorders, Journal of Pediatric Neurology and Medicine, Journal of Neuroinfectious Diseases, Annals of Neurology, Behavioural Neurology, Cardiovascular Psychiatry and Neurology, Chinese Journal of Contemporary Neurology and Neurosurgery, Current Neurology and Neuroscience Reports, Current Opinion in Neurology, Current Opinion in Neurology and Neurosurgery, Developmental Medicine and Child Neurology, Egyptian Journal of Neurology, Psychiatry and Neurosurgery, European Journal of Neurology, European Neurology, Experimental Neurology.

Cancer Case Reports

Cancer is the abnormal cellular growth and proliferation, generally due to the unequal distribution of cellular nutrients. The state of cancer is determined with the term 'malignancy', which implies the progressiveness of the cellular anomalies towards pathological climax. Normally cancer develops when body's normal control mechanism stops working. There are more than 200 different types of cancer have been identified. Some cancers may eventually spread into other tissues and the scenario is called metastasis. In a gross scale of observation, cancer can be broadly classified into five main categories, which are carcinomas, sarcomas, leukemia, lymphoma, and CNS tumor such as glioma. Though, cancer is not conclusively curable, it is only possible to delay the progressiveness of the disease pathology by surgery, chemotherapy and radiation therapy. The case reports on different challenging conditions of cancer are the milestones in the progress of cancer research and also a valid guidance for a better future therapeutics.

Related Journals of Cancer Case Reports

International Journal for Case Reports, Journal of Carcinogenesis and Mutagenesis, Journal of Nuclear Medicine and Radiation Therapy, Journal of Blood Disorders and Transfusion, Journal of Cancer Diagnosis, Academic Journal of Cancer Research, Cancer Clinical Trials, Annals of Cancer Research and Therapy, Anti-Cancer Drugs, Anticancer Research, International Institute of Anticancer Research, International Institute of Anticancer Research, Asian Pacific Journal of Cancer Prevention.

Nephrology Case Reports

Nephrology is the branch of science, which deals with the study of kidneys and its related diseases. The physician, who studies and deals with the diagnosis and management of kidney disease is called nephrologist. Several disease pathologies have been associated with the studies of nephrology, which includes glomerular disorders, urine abnormalities, Tubulointerstitial diseases, renal vascular diseases, renal failure, Kidney and bladder stones, Kidney infections, kidney cancer, effect of diseases like diabetes and high blood pressure on kidneys. Clinical and experimental studies dealing with real life experiences on the patients suffering from various renal disorders are published in the form of Nephrology Case reports, which are having utmost importance in nephrological researches.

Journals Related to Nephrology Case Reports

International Journal for Case Reports, Journal of Clinical & Experimental Nephrology, Clinical Nephrology, BMC Nephrology, Kidney International, International Journal of Nephrology, Journal of Nephrology.

Case Reports in Diabetes

Diabetes or diabetes mellitus is a metabolic disorder due to reduction in the insulin production or autoimmune due to insulin resistance. It is a long term condition, which causes high blood sugar level. In physiological perspective, the person suffering from diabetes could be classified either due to inadequate insulin production or due to bodily non-responsiveness to insulin or both. Individuals with high blood sugar level experience various symptoms such as polyuria, polydipsia, and polyphagia. There are several types of diabetes have been reported and clinical and experimental studies on diabetes covers a major part of global scientific reports. Besides research and review work on these respective field, case reports on diabetes also plays an important role for the proper clinical diagnosis in challenging diabetic cases.

Journals Related to Diabetes Case Reports

International Journal for Case Reports, Journal of Diabetes & Metabolism, Journal of Metabolic Syndrome, Journal of Clinical & Cellular Immunology, Journal of Clinical Diabetes & Practice, Diabetes Mellitus, Diabetes Research and Clinical Practice, Diabetes Technology and Therapeutics, Diabetes, Metabolic Syndrome and Obesity: Targets and Therapy.

Health Care Reports

Health Care is the improvement of health by the diagnosis, treatment, and prevention of diseases. There are three types of health care namely, primary, secondary and tertiary health care. Primary health care denotes the first level

of contact between individuals and families with the health system. Secondary health care refers to health system in which patients from primary health care are referred to specialists in higher hospitals for treatment. Tertiary Health care refers to a third level of health system, in which specialized consultative care is provided usually on referral from primary and secondary medical care. Clinical and experimental studies that describe provide detail about different health care issues are commonly termed as health care reports, which are having immense importance in proper distribution of health care irrespective of race, sex, region.

Related journals of Health Care Reports

International Journal for Case Reports, Dentistry, Journal of Probiotics & Health, Primary Healthcare: Open Access, Journal of Health & Medical Informatics, Clinics in Mother and Child Health, Acta Scientiarum - Biological and Health Sciences, Acta Scientiarum - Health Sciences, Homeostasis in Health and Disease, Asian Journal of Pharmaceutical Research and Health Care, Journal of Pharmaceutical Research and Health Care, International Advancement Center for Medicine & Health.

Immunology Reports

Immunology is an important branch of medical as well as biological sciences, which deals with the study of immune system. The physician, who specialises in the field of immunology, is called as immunologist. The immune system protects us from various infections through its various defence mechanisms, which include physical, chemical, and biological properties of organism that help to combat its susceptibility to foreign organisms, material etc. Clinical and experimental studies that describe and provide detail on the disorders relating to immune disorders can be termed as Immunology Case reports.

Related journals of Immunology

International Journal for Case Reports, Insights in immunology, Journal of Molecular Immunology, Journal of Clinical & Cellular Immunology, Journal of Molecular and Genetic Medicine, Immunome Research, Journal of Clinical & Experimental Neuroimmunology, Advances in Immunology, Allergy, Asthma and Immunology Research, Allergy: European Journal of Allergy and Clinical Immunology, American Journal of Immunology, American Journal of Reproductive Immunology, Annual Review of Immunology, Asian Pacific Journal of Allergy and Immunology, BMC Immunology.

Reports in Orthopaedics

Orthopaedics is the branch of science, which deals with the deformities or functional impairment or disorders of musculoskeletal system especially the extremities of spine and associated structures such as tendon and ligaments. Orthopaedic physicians with surgical expertise are called as orthopaedic surgery. Orthopaedic medical stream also deals the 'Biomedical branches of medical science', which is responsible for the medical assistance related to prosthetic limbs, biosensor, bio-robotics etc. The specialized reports containing clinical and experimental studies on challenging orthopaedic pathophysiology is termed as orthopaedic case reports, which are having relevance for proper diagnosis and treatment of complicate issues.

Related Orthopaedic Reports Journals

International Journal for Case Reports, Journal of Orthopaedics, Journal of Orthopaedic Surgery and Research , Journal of Clinical Orthopaedics and Trauma, Journal of Arthroplasty, International Orthopaedics, Journal of Pediatric Orthopaedics.

Case Reports in Pathology

Pathology is a major field in the modern science and diagnosis of which deals with proper scientific experimentation with available knowledge about the disease. The physician, who specialises in the field of pathology, is called a pathologist. Pathology also refers to the prediction or actual progression of a particular disease. Pathology majorly deals with cause, mechanism of development, structural alterations of cells or tissue, and the related consequences of changes of an ongoing disease. Clinical and experimental studies on pathological field describes the underlying molecular mechanisms involved in diseases, which reach to the global reader in the form of Pathology case reports, which is having immense importance in the field of medicine.

Journals Related to Pathology Case Reports

International Journal for Case Reports, Journal of Clinical & Experimental Pathology, International Journal of Ophthalmic Pathology, Diagnostic Pathology: Open Access, Research & Reviews: Journal of Pathology & Epidemiology Analytical Cellular Pathology, Annual Review of Pathology: Mechanisms of Disease, Annual Review of Phytopathology, Biomedicine and Aging Pathology, Brain Pathology, International Society of Neuropathology, Brain Tumor Pathology.

Gynaecology Case Reports

Gynaecology is the branch of medical science, which deals with health maintenance and diseases of female reproductive system. The study of gynaecology includes the investigation on the pathophysiological alterations in ovaries, uterus, vagina and breasts. The specialized physician on the field of gynaecology is called as gynaecologist. Almost all gynaecologists are obstetricians because in many areas of the specialities of gynaecology and obstetrics have been shown to be overlapped. The clinical and experimental studies on female reproductive health covers a major part of female physiological reports and the case reports on gynaecology opens up new avenue to explore the scientific approaches for a better female health globally.

Related Journals to Gynaecology Case Reports

International Journal for Case Reports, Gynecology & Obstetrics, Clinics in Mother and Child Health, Journal of Women's Health Care International Journal of Gynecology & Obstetrics, American Journal of Obstetrics & Gynecology, indian obstetrics and gynaecology journals, World Journal of Obstetrics and Gynecology, Medical Journal of Obstetrics & Gynecology - JSciMed Central, Journal of Obstetrics and Gynaecology Canada.

Stem Cell Case Reports

Stem cells are the undifferentiated cells of animal body, which are capable of producing similar kind of cells, and have been reported to show the potency to differentiate with region specificity. Generally, stem cell divides and multiplies their number under certain ambient environmental condition and in particular stage of cellular maturation; they give rise to the cell types, which are most desired from it. These cells are normally found in brain, embryo, umbilical cord, bone marrow, peripheral blood, blood vessels, skeletal muscle, skin, teeth, heart, gut, liver, ovarian epithelium, and testis. There are two types of stem cells in mammals, embryonic stem cells and adult stem cells. Clinical and academic researchers have reported several cases of stem cell therapy and implantation techniques, those are having immense importance in the therapeutic perspective in various diseases.

Related Journals to Stem Cell Case Reports

International Journal for Case Reports, Journal of Tissue Science & Engineering, Translational Medicine, Anatomy & Physiology: Current Research, Journal of Bone Marrow Research, International Journal of Stem Cells, Journal of Stem Cells, Journal of Stem Cells and Regenerative Medicine, Stem Cells, Stem Cells and Cloning: Advances and Applications, Stem Cells and Development, Stem Cells International, Stem cells translational medicine, Cloning and Stem Cells.

Psychology Case Studies

Psychology is the branch of science, which deals with the study of human behaviour and state of mind. The physician, who got specialise in the field of psychology is called a psychologist. It involves all aspects of conscious and unconscious experience as well as thoughts. A psychologist can be classified as social, behavioural and cognitive scientist. Psychology Case reports are priceless piece of information dealing with clinical or experimental studies that use to help to diagnose and treat the other psychological issues.

Related Journals of Psychology Case Studies

International Journal for Case Reports, Journal of Psychology & Psychotherapy, Journal of Psychiatry, International Journal of Emergency Mental Health and Human Resilience, Abnormal and Behavioural Psychology, Mental Illness and Treatment, Biological Psychology, Biological Psychiatry, British Journal of Developmental Psychology, British Journal of Developmental Psychology, Psychology Press, Cognitive Neuropsychology, Ecological Psychology, Evolutionary Psychology, Journal of Clinical and Experimental Neuropsychology, Child Neuropsychology, Journal of Comparative Psychology, Journal of Comparative and Physiological Psychology.
