

[Images in Endocrinology Journal and Metabolism Case Reports](#) publishes imaging in Endocrinology, case reports in clinical Endocrinology surgery, videos in Endocrinology, case reports in Diabetology, case reports in Metabolism, case reports in Diabetes journal etc. Endocrinology is the sub discipline of medicine which deals with the diagnosis and treatment of diseases related to hormones. It deals with human functions such as the coordination of metabolism, respiration, reproduction, sensory perception, and movement.

Endocrinology is a medical specialty that deals with the diagnosis and treatment of diseases related to hormones, particularly the biochemical processes involved in the body's normal functioning. It deals with areas related to the field such as biosynthesis, storage, chemistry, and physiological function of hormones and with the cells of the endocrine glands and tissues that secrete them.

Endocrinology mainly focuses on the endocrine organs, such as pituitary, thyroid, adrenals, ovaries, testes, pancreas, secretions called hormones, also its diseases and other syndromes. Behavioral Endocrinology is a study of hormones and their influence on the regular behavior. Studies related to behavioral endocrinology have assessed that there is a casual relationship between the presence of a hormone in the circulatory system and the occurrence of certain behavioral patterns. They have also concluded that the frequency of the behavior alters if the endocrine gland producing hormone is removed.

Clinical endocrinology is the study of the endocrine system, its function, and its diseases or abnormalities as related to patient care. In other words, a clinical endocrinologist would spend most of his/her time seeing patients who have one or more disorders of the endocrine system. The endocrine system can be defined as those organs in the body which release hormones that regulate many of the body's functions, like the testes and ovaries, the pancreas, the pituitary gland, and the thyroid gland.

Journal Scope and Keywords: The Journal of Clinical Endocrinology & Metabolism, American Journal of Physiology-Endocrinology and Metabolism, European Journal of Endocrinology, Journal of Endocrinology, Endocrine Journal, Journal of Molecular Endocrinology, International Journal of Endocrinology, Journal of Clinical Research in Pediatric Endocrinology, International Journal of Pediatric Endocrinology and Journal of Pediatric Endocrinology and Metabolism.

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission Portal:

<https://www.literaturepublishers.org/submit.html>

(or) also invited to submit through the Journal E-mail Id: editor.cicrj@literaturepublishers.org
