

CV – Dr. Mario Troisi

Master's Degree in Medicine and Surgery with 110/110 cum laude and special mention at the University of Salerno (IT). Specialization in Ophthalmology at the University of Naples Federico II. II level Master's degree in Aesthetic medicine, in Biostatistics for clinical research and scientific publication, and in Systematic Reviews with Meta-Analysis. Clinical fellowship in cornea at the University of Brescia (IT) in 2024. Ophthalmologist at Salerno University Hospital.

Author of more than 25 publications, mostly as first author, on international peer-reviewed journals, and of a monograph on conjunctival microvilli. Speaker at more than 40 national and international conferences and awarded by many scientific societies as ESCRS (European Society of Cataract and Refractive Surgeons), EVER (European Association for Vision and Eye Research), EuDES (European dry eye society), Thea Pharma, ARVO (Association for Research in Vision and Ophthalmology), EuCornea. Member of the Editorial and Reviewer board of several international journals with more than 70 verified peer-reviews. He keeps himself constantly updated by attending national and international ophthalmology conferences and training courses.

His research field is on cornea and ocular surface diseases. He is part of a multidisciplinary research group that pioneered the application of scanning electron microscopy (SEM) for the diagnosis of complex ocular surface infections and dry eye disease, enabling the identification of pathogens and microstructural abnormalities missed by standard diagnostic techniques. He is currently involved in many clinical trials on cornea and external diseases.
